BACHELOR OF COMPUTER AND INFORMATION SCIENCES

SOFTWARE DEVELOPER

A competent junior software developer and digital solutions enthusiast with solid expertise in the software development industry, primarily working on Windows-based environments using C#, Visual Basic, Java, JavaScript, HTML/CSS, and React. Main expertise focuses on full-stack development, ASP.NET applications, and API integrations, including SAP API integration for enterprise-grade solutions. Detail-oriented and proactive with strong UI/UX design skills and a background in both frontend development and cloud technologies like Microsoft Azure and Firebase.

With practical experience in developing secure, responsive web and mobile applications, I also bring value through my involvement in digital marketing, graphic design for social media, and market research initiatives. Additionally, I have supported tender administration processes, specifically working on compiling and refining technical requirement documentation. I am adaptable, reliable, and capable of managing tasks independently or collaboratively in a team setting. Most importantly, I am committed to delivering high-quality software solutions that meet user and business needs.

PROFESSIONAL EXPERIENCE

Providence Software Solutions (Pty) Ltd
Junior Software Developer

JAN 2025 - Present

- Contributed to the development and maintenance of ASP.NET applications using C# and Visual Basic, improving system functionality and reliability.
- Gained hands-on experience in front-end and back-end development, including the creation of responsive user interfaces and seamless integration with databases.
- Developed web applications using React for dynamic client-side interactions and enhanced user experience.
- Successfully integrated SAP APIs to streamline data exchange between enterprise systems and client-side applications.
- Designed and implemented modern UI/UX interfaces, focusing on user accessibility, responsiveness, and visual appeal.
- Built and deployed high-quality frontend projects that showcase innovative features and interactive design elements.
- Supported the marketing department by conducting market research and assisting in the design of engaging social media graphics.
- Participated in digital marketing campaigns and contributed to the planning and execution of online brand strategies.
- Provided administrative support in the tender process, including compiling and editing technical requirement reports for proposals.

Provided personalized C# and Java programming tuition to first and second-year students, helping them strengthen their understanding of core concepts, improve coding skills, and successfully complete coursework. Tailored lessons to individual learning styles, fostering a supportive and engaging learning environment that encouraged student success

Afzal Fragrances

2018 - Present

Sales and Marketing Specialist / Webmaster

- Performed various functions in a family-orientated business which allowed my skill-set in all business operations to be explored.
- Managed sales teams at various exhibitions across the country.
- Assisted in research & development of innovative products in the industry.
- Currently managing and working part-time at a mall-based outlet for the company.
- Revamped and currently managing the company's website by transforming an outdated PHP-based platform into a modern, innovative WordPress e-commerce site. This involved implementing responsive design, optimizing user experience, and integrating advanced e-commerce functionality to drive online sales and enhance the brand's digital presence.

Vrentals Car & Van hire

July 2021 - December 2021

Data Capturer and Administrative Assistant

6 Months

- Accurately entered and managed large volumes of data, ensuring high levels of accuracy and efficiency.
- Developed strong attention to detail and the ability to maintain full concentration in a fast-paced environment.
- Collaborated effectively with team members to streamline administrative processes and improve overall office efficiency.
- Gained experience in handling confidential information, maintaining records, and supporting daily operational tasks.
